

THE CALGARY CALL

VOLUME XXX No. 49

GLEICHEN, ALBERTA, WEDNESDAY FEBRUARY 23, 1938

SUBSCRIPTION \$2.00 PER YEAR

REPORT OF LAST MEETING OF TOWN COUNCIL

Before the recent town election the members of the council held a meeting. The following is a report of it:

A letter had been received from E. B. Bowers and was read. This gentleman made an assessment of the town a few years ago. The letter stated a new assessment would cost \$355. The reduction from the previous assessment being made possible on account of the fact that the detailed record of the previous assessment were available in the town office, which would save re-measuring most of the buildings, but that every building or structure will have to be re-examined in detail and re-valued. The figure of \$355 included: all lands, improvements and assessments for business tax purposes. A motion by Councillor Michael and Deshayes it was decided to appoint Mr. Bowers assessor. It was also decided to come as soon as possible and the secretary is to notify the Department of the appointment.

A bylaw had been introduced at the meeting held on January 24th allowing 4 per cent interest on prepayment of 1938 taxes and it was given its first reading at that meeting. It was found, however, that there was no provision in the Town or Village Act for this accordingly this bylaw was rescinded.

Two applications for relief was made and the matter was dealt with by the Department with respect to relief application of F. Dackiewicz and requested that a sworn declaration from this man be obtained. It was decided to have a sworn declaration from this man be obtained. The secretary was instructed to obtain this information. There was an angry letter from the Department in connection with persons afflicted with blindness. The letter pointed out that where a blind person is not to be allowed a pension which pension was not considered as part of the family income, and relief would be granted to the family without taking into consideration any pension which may be received by a blind member of the family. The letter was placed on file for reference.

A communication from the Blackfoot Municipality was read relative to taxes N.E. 38 and N.W. 24-2-23. The owner of the above property, Mrs. C. M. Klepper was prepared to pay the balance of the taxes, but providing she would be allowed the usual concessions permitted under the act. The town advised the municipality that the town would be willing to accept the town, and a check for \$328.00 had been received by the town. The town was read this was in connection with tax consolidations agreement on north half 23-2-22, which had been extended from 1936 to 1938, and asked the approval of this council that such extensions be granted to the unpaid 1938 instalments and 1936 taxes. The council agreed to do this.

The secretary reported that all the land instruments of the town have been handed over to Mr. Hirtle for use in organizing a town band. Mr. Hirtle would be responsible for the instruments. This was agreed to by the council.

A policy on the Community Hall was carried by a firm in Calgary, and it had been suggested that this be carried by a local agency. An application had been received from Mr. Murray for this business in case of change of agency. Mr. Murray suggested that the premiums earned should be secure the business should be cancelled the business with the Calgary firm in place of it in the hands of Mr. Murray.

Councillor Michael advised the council that an examination of the building on lot 2 in block 4, which had been occupied by the firm of Callum & Sturminster had been made by Mr. Lester. A valuation of \$75 had been placed on the building. The assessed value as shown by the tax roll is \$100, building \$480, representing two-thirds of the value. The building would require re-shingling at a cost of \$40.00 and a new floor would be necessary if the building was to be rented. It was also estimated that this was a hazard according to the terms of the by-law.

News Items of Local Interest

Bernard Thorburne left for the Pacific coast last Friday and will remain there for sometime.

When the weather moderated Sunday it was a welcome change. Almost everyone seems to be fed up with the winter and will be mighty glad when spring comes.

Gleichen rinks did very well at the Cluny bonspiel last week, winning first in one competition and second in another.

Mrs. Bowen formerly a resident of Gleichen but now of Peace River is at present visiting Mrs. J. A. Menard, Mrs. Stowen has just returned from a visit to the eastern states.

Elm Woods returned home last week after spending three weeks holidaying with his brother-in-law, C. G. Woods. He had a wonderful time even though the weather was cold.

Skating has become a very popular sport in town. The young folks spend as much of their time skating as they formerly did skating. They have a lot of fun being pulled around the town of ice has been ideal for the sport.

Mrs. Stephen Bullen, daughter of Mr. and Mrs. B. Thorburne, received a telegram last week announcing the birth of her husband on February 18th, at St. Austell, Cornwall. Mr. Bullen was known in Gleichen having spent some time here last summer before he left for the Old Country in September.

A very enjoyable card party was held on February 16th by the Meadowbrook Ladies Social Credit Group. The hostess being Mrs. Kenneth McEwen and Mrs. Pierrard. Twenty-two members and friends were present. First prizes were won by Miss E. Weeks and Neal McMillan and trophy prizes by Kenneth McEwen and Miss B. Richardson. Supper was served by the hostess and her assistant.

REMOVE SNOW FENCE OBSTACLES

Alberta intends to see that there are no obstacles to motor traffic caused by lack of snow fences, it appears from an act to amend the works act which has been introduced in the legislature.

The new act permits officials of the public works department to erect snow fences upon any land alongside a highway and to have the right to enter upon the land from time to time to replace, repair and remove such fences.

Furthermore, no person shall be entitled to any rent or compensation whatsoever for the erection of snow fences.

When the bill was debated in the legislature, Hon. W. A. Fallow, minister of public works, stated that while most people were agreeable to having snow fences erected, there was an odd case where the land owner wanted compensation. At the same time the department was prepared at any time to adjust damages.

There are many places along the highways where snow fences form the only way of preventing drifting. One member said farmers were usually glad to have snow fences erected as they assisted in preserving moisture in the land.

A discussion took place as to the best thing to do with the property. It was thought it might be possible to sell the building and have it moved away, and in its place a new building erected. At the same time there was no gap between the buildings. It was decided to advertise and offer it for sale. The buyer could either purchase the building alone or both the building and lot. Tenders will close on March 31st.

The secretary was asked for a list of outstanding business taxes for 1937 and these were submitted. After looking over the list the council instructed the secretary to notify all concerned that these arrears must be paid forthwith.

A leak in the water main at the McPhy Hardware store caused considerable loss of water during the past week or two. For sometime it has been known that it has made a sheet of ice a foot or two thick covering quite a large area. By Monday night the leak had been repaired and the pumps were busy refilling the reservoir and tank.

The Junior U.F.A. meeting was held at the home of Mrs. Kalkins with 16 members and three visitors present. The meeting was opened by singing its Long Way to Tipperary and Annie Rooney. The roll call was followed by a favorite song. When the business of the meeting was finished the Shamrock Group entertained with a delightful lunch. The notes were thanked on behalf of the Juniors while they sang for She's a Jolly Good Fellow. The next meeting will be held at the home of Mrs. H. Hurns on March 4th.

The Calgary Presbytery of the United Church of Canada is meeting this week in Central Church, Calgary. All members and guests are expected to be present. In addition to the regular business, the work of each of the churches for 1937 will be called for and discussed. A place on the agenda is allotted for the report and discussion of the work of the W.M.S. Rev. J. N. Wilkinson is attending as representative from Arrowwood, Cluny and Gleichen.

THE WORLD OF WHEAT

By H. G. L. Stange Director of "Crop Testing Plant"

There is no single country where the entire population enjoys a standard of nutrition adequate for the maintenance of health.

This was the conclusion just arrived at by the Special Nutrition Committee of the League of Nations. Dr. John Orr, probably the world's greatest expert on nutrition, last year came to the same conclusion. "Farmers are underfed!" he said.

Farmers are expected to supply the extra food needed by city people as a reward for supplying the additional goods and commodities which farming people so badly need. Why are not these simple exchanges taking place? Some say it is because the capitalist system, the economic system, the methods of distribution and marketing, of transportation and of banking have broken down so that this cannot be, for all these concerns and businesses are most eager to bring about the needed exchanges.

In my humble opinion it is actually statelessness the world over that has broken down. Those in charge of affairs, by means of high tariffs, quotas and other restrictions, are curtailing the exchange of farm products of city goods, feeling apparently, that they lose all they buy and sell somewhat the more we shall all have. What a sad and pathetic fallacy! If it were not so tragic it would be just silly.

Following factors have tended to raise prices: U.S. government intends to eliminate gold to broaden credit basis. Malaria situation unfavorable in Tunis. Canada imports U.S. wheat. Germany buys 30,000 tons of winter wheat belt. Beneficial showers in Algeria. All Indian crops doing well. Japan's rice supply increased. Spring plowing commences in Russia. Favorable weather in Italy allays fears of a wheat shortage. Yugoslav winter crops in good condition. Increased exports of soy beans from Manchuria.

GUNNERS PUT OUT OF PLAYOFFS BY STRATHMORE

Gleichen is out of the play-down by virtue of their defeat at the arena Monday night by Strathmore to the tune of 9-5 or for the round 14-9. The Gunners second string stole the spotlight for Gleichen as far as scoring was concerned by making four of the five goals. The Lester Brothers making four of them being assisted while the fifth goal was made by J. Wolf.

Strathmore made two goals in the first, Gleichen picking up one counter through B. Lester, from B. Brown and E. Lester Strathmore had two men in the penalty box at the time. The first player being penalized for tripping while the second was put off when it was found Strathmore had too many men on the ice. E. Lester scored from B. Brown in the second while Strathmore made two goals. The period ended 4-2 for the visitors. The first player being penalized for tripping while the second was put off when it was found Strathmore had too many men on the ice. E. Lester scored from B. Brown in the second while Strathmore made two goals. The period ended 4-2 for the visitors.

The third saw both teams go on a scoring spree; Strathmore making four in a row then Gleichen, 4-3. W. Lester; Wolf from W. Lester, and the last by W. Lester. As a grand final Strathmore made another when they nobody to be beat but W. Lester made the goal. Strathmore got the breaks of the game. They played better defensively than their own team.

The largest crowd of the season was on hand to witness an ideal night except for a light fog. Here's wishing Strathmore the best of luck and may they face in the playoffs and no doubt many Gleichen fans will attend some of the games in the west end town.

LINEUP OF TEAMS
Strathmore: Cleve; C. Giroux, Gibson; A. Malin, G. Crellin, G. Giroux; D. McRae, C. Vanthegem, Cook, L. Vantighem.
Gleichen: Wilson; T. Brown, Murray; R. Brown, C. Brown, E. Lester; W. Lester, Wolf, Clifford, Desjardins. Referee: J. Souter, Calgary.

OUR SCHOOL BOARD

The members of the Gleichen school board, who sought re-election, being accorded an acclamation means that the same gentlemen will direct the affairs of our school district for another year. Nobody should have a serious objection to this situation as Messrs. Ferguson, Boyd, McFerguson and Daeke have done good work in the past, and can be depended upon to maintain their record in 1938.

The school board does not come into the limelight, as much as the council, but they do a lot of hard work, have to exercise good judgment and care at all times, while it is a mistake to think that they have not numerous trying situations to meet from time to time. The fact that there is very little criticism of the school board is the best evidence that they are doing their work well, and are making progress, despite the times.

Those people felt that the two retiring trustees had done good work, and if they wished to continue in office they would not put anything in their way, and hide their eyes and wait more favorable opportunities for service in the community along school board activities.

The Call wishes the continuing board every success in their work, knows that they will meet all problems in a really progressive way and in the spirit of co-operation. Planned economy and progress can go hand in hand even in strenuous times, as progress does not mean unnecessary spending of money. The good skipper does not stop the ship just because the waters are rough, and always has the bow pointed toward the opening toward safer waters, never allowing his boat to stand still. Many institutions today are not only standing still but backing up so rapidly that they will be worse than helpless when the calm of better times is reached. The fact that our local school board is not allowing education to be sacrificed upon the

Here's Something New for dinner

DRIED OR PICKLED FISH

Want to surprise the family with a new dinner treat? Serve them a tasty dish of Dried or Pickled Canadian Fish.

No matter where you live, your dealer can get you such Dried Fish as Cod, Haddock, Hake, Cusk and Pollock, and such Pickled Fish as Herring, Mackerel and Alewives . . . in perfect condition. Interesting recipes can be used for every one of these fine fish. Fish is a wonderful health food, good for every member of your family. It is the great source of proteins that help build sturdy, healthy bodies.

Serve Dried or Pickled Canadian Fish to your family often . . . they will enjoy it . . . and you will find it economical, too.

The best papers come in the handiest booklet—It's Double Automatic

Hidden Taxation

The recent announcement that the national revenues of Canada for the first ten months of the current year showed an increase of more than \$60,000,000 over the corresponding period of the previous year, with the assertion that each month's balance sheet brings the possibility of a balanced budget nearer is undoubtedly cause for gratification, in Ottawa at least.

The same announcement also reported a decrease of nearly \$12,000,000 in expenditures for the same period; in other words a net gain to the budget of approximately \$78,000,000 and when revenues and expenditures were offset one against the other, a surplus of \$23,500,000 was shown, which, it was stated, may be wiped out by special heavy expenditures for relief and the C.N.R. deficit when the fiscal year ends on March 31.

A Proper Point of View

From a strictly financial viewpoint, unquestionably a balanced budget or, to go a little farther, an excess of income over expenditure is a good thing whether it appears in the financial statement of a government unit, a private corporation or an individual. The principle has been recognized as a proper one for a long time. Charles Dickens, it will be remembered, pointed out the advantage, in terms of happiness at least, of an excess of revenue over expenditure, even when the balance is not in the right place when he quoted Macbeth's now historic remark on the subject. If the principle of making both ends meet, or overlap a little, is sound in the case of the individual, it is equally sound in the administration of corporate affairs, private or governmental.

A surplus of revenue over expenditure is usually regarded as a hall mark of prosperity and the showing made by the Federal finances during the current fiscal year to date will undoubtedly be considered a symbol of financial recovery for the country as a whole.

Two Methods of Approach

In governmental administration there are two roads which lead towards the goal of equilibrium between income and outgo. One of these is the path of reduced expenditures; the other, and sometimes the more easy one, is the broad road of greater revenues. The former is the real test of efficiency, so long as it is not carried beyond the point which would cause rejection, if the "penny wise, pound foolish" test were applied to it.

On the other hand governments are wont to congratulate themselves when the money tinkles in the cash register in increasing volume on the ground that it is a sign of increasing prosperity and property, of course, they say, is due to the policies of the administration that happens to be in office at the time, which may or may not be true, or which may be only true in part.

Only One Source

It has been pointed out time and again, but the fact is often overlooked, that there is only one source of governmental revenue—taxation in some form or another. The money must come out of the pockets of the people ultimately, directly or indirectly. If money is flowing more freely into governmental coffers it is only because people are paying more taxes than before. It may be in the form of an increase in rates or a decrease in exemption of direct levies or it may be in the form of increased rates on indirect tariffs and charges on goods and services, or it may represent merely a larger volume of turnover of goods and services with an increase of taxation charges against them. It may be a combination of any two or more of these.

If analysis, where analysis is possible, shows that revenue represented by indirect taxation on commodities and services are increasing, due solely to a rising turnover in volume of business without changes in rate structure, then it can only be attributable to increased prosperity. If, on the other hand, increased revenues are not the concomitant of increased volume of business, but caused solely by increased prices of commodities, again without any change in rate structure, the figures may be a myth as a barometer of prosperity. The latter is the index of the real thing, if it means that the taxpayers are contributing more towards the cost of government for the same amount of goods and services without a corresponding increase in the taxpayer's income to meet the additional charge.

An Element Of Guilt

Unfortunately for the average taxpayer it is very difficult, if not impossible, for him to ascertain with any degree of accuracy what he is contributing towards the cost of government when it comes to indirect taxation. So far as he is concerned it is truly "hidden" taxation. Authorities may quote figures, and they frequently do, in an endeavor to enlighten him, but as these authorities invariably differ and their figures are at least partially based on estimates, the result is usually befuddling.

Sometimes one is almost tempted to believe that it would be better for the taxpayer if all taxation were confined to the field of direct levies. It would certainly make the taxpayer tax-conscious if he knew exactly what he is contributing towards the cost of government.

Fire Started By Cat

And now it appears the family cat has to be taught along with the children not to play with matches. For it was Oscar Phaneuf's cat that was blamed for setting fire to his home in East Angus, Quebec, causing damage to the interior. The cat, nibbling at a box of matches, was blamed for the blaze.

WAKE UP LIKE A CAVE MAN

Feed Full of Life—No More Tired, Dull, Heavy Mornings

Keep your liver healthy and you'll feel great every morning. When you wake up feeling "tired," your liver is not working properly. Your liver cleans the blood of poisons, eliminates the metabolic waste from the body. Supplies energy to muscles, maintains the metabolism—gives you the vitality, helps maintain health and inclination to work properly. Keeps you energetic, hungry, isn't enough. "Fruit-A-Tives" made from fruits and herbs, will strengthen and build up your liver the morning you wake up. You'll be awake and well you are every morning. Try Fruit-A-Tives. All druggists.

FRUIT-A-TIVES LIVER TONIC

FLIN FLON

"The Story of Its Finding and Position To-day"

By FRANK KUHN

Last week we'd just started from Island Falls for Flin Flon in an outboard motor canoe—we continue our journey.

Another canoe, 24-foot, was equipped with a 14 h.p. Johnson outboard, attaining speed of 12 miles per hour for the four miles across Muddy Lake. The most portage was a long one, over two miles, but here we found land in our way and a Plymouth gas locomotive pushed a flat car carrying the canoe and passengers across to Camp 8 where a 40-foot motor boat took us 20 miles across Barrier Lake. Lunch was served on the boat and tea was made with water boiled on the mainfield. The engine, this with evaporated milk, thick pork sandwiches and preserved peaches as desert certainly tasted good. Reaching Camp 8 at the mouth of the lake we portaged one mile, again with a tractor and wagon, finding a 24-foot, 4-cylinder gas yacht on Lake 2 that carried us to Camp 8 where we had just arrived, soaking wet, on the dock. We were luckily an hour late or had had missed out and we would have had to walk 20 or more miles. Second street car coming shortly out there!

We lived at Camp 38 but had just arrived on a patrol. Without time to speak to his wife, because he'd heard the boat coming, he grabbed the boat and with his sharp axe and bit bag made the wharf to catch us. That day he'd seen moose and a black bear on the lake. He says moose are plentiful but it would be hard to find them. He says moose we hit ourselves to the straps and the boat pulled it, lost the canoe and boys, over to Lake Muri.

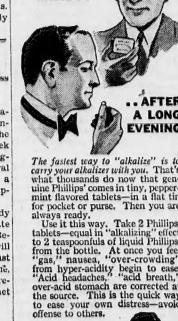

Note the developments in 1936. How that dump heap has grown!

"Now that you are married!" said the bride's mother. "I suppose you'll take out an insurance policy?" "Oh, no," replied the husband, smiling. "I don't think she's going to be dangerous."

30 MINUTES AFTER Eating-Drinking ALCOHOLIZE

AFTER A HEAVY MEAL...

The fastest way to "alcoholize" is to drink this beverage. That's what thousands do now to give liquid Phillips' comes in thin, pepper-mint flavored tablets—a flat in for pocket or purse. Use it this way. Take 2 Phillips' tablets—swallow in "alcoholizing" liquid. Then drink 2 teaspoons of liquid Phillips' tablets in a glass of water. "gas," nausea, "over-crowding" from hyperacidic build to ease. Acid foodstuffs and bad breath, over-acid stomach are corrected at once. This is the only way to ease your own distress—avoid offense to others.

Zinc Trash House. Man wears nose and mouth mask to avoid inhaling fumes. He is stripping the zinc in sheets from the cathodes which are made of aluminum at Flin Flon mines.

where a nice white yacht was waiting in the boat house equipped with a six-cylinder Island gas engine. We telephoned from the boat house to Island Falls and they instructed us to watch a certain point where a fire fighters who were rushed up two weeks before should be ready to come out. Johnson also phoned his wife at Camp 38 through Island Falls, which acts as Central, so she might know where he was. Boy—'d like to get lost in the forest some time for a few days when phones can't catch up with me!

The Passing Years

Changed Positions Of Russia's Czar And A Polish Pianist

On a gala afternoon the czar of all the Russias sat with his court, listening to the playing of Paderewski. Charmed by the musical genius, Nicholas expressed delight that the great pianist was a citizen of Russia.

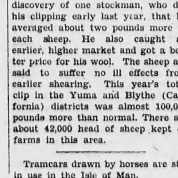

"Your majesty," replied Paderewski, "I am not a Russian; I am a Pole."

Smiling, the czar replied, "There is no such country as Poland—now there is only Russia."

"Pardon my hasty remark," said the artist, "you speak but the truth." Then with quiet dignity he turned to his piano and played, as an encore, Chopin's "Funeral March."

The innovation resulted from the discovery of one stockman, who did his clipping early last year, that he averaged about two pounds more in each sheep. He also caught an earlier, heavier market and got a better price for his wool. The sheep now said to suffer no ill effects from earlier shearing. This year's total clip in the Yuma and Bythe (California) districts was almost 10,000 pounds more than normal. There are about 42,000 head of sheep kept on farms in this area.

Tramcars drawn by horses are still in use in the Isle of Man.

Platinum In Alaska

Production Last Year Was Valued At Nearly \$242,000

Eleven years ago platinum was discovered at Goodnews Bay, off Bering Sea, by Charles Thoren, a "word-of-mouth" prospector. The working of deposits along certain streams by modern dragline excavators commenced in 1924, and by last summer operations had so increased as to merit the description of a rush. A bucket dredge was installed and is now in operation. Over 5,000 ounces of platinum, valued at nearly \$242,000, were produced last year by the new district, and indications are that this year production will be even larger. Annual world production rarely exceeds 300,000 ounces.

Dr. J. B. Mertie Jr., of the Geological Survey, found that the probable source of the Alaskan platinum is an elongated ridge seven miles by two, called Red Mountain, in the platinum region northeast of Goodnews Bay, and the deposits thus escaped being gouged out and carried away.

A new note in Science says that the deposits resemble geologically the rich placers of the Urals Mountains. Like the Russian deposits, the source rock contains insufficient platinum for profitable working, but the stream beds, where platinum freed from the source rock has collected, can be dredged for the metal profitably. This year, winter the ponds freeze up too soon, the Diesel-powered dredge will scrape up nearly 20,000 ounces of platinum metals from the bed of Platinum Creek—New York Sun.

Proved Something

To show he was a better man than one he read about, who ate 40 pancakes, Elmer Shier, living near Lima, Peru, consumed 47 at one sitting. The pancakes were weighed down with four cups of coffee, and several slices of bread completed the meal.

Johannesburg, South Africa, will spend \$67,000 to eliminate slums for natives.

Over 5,000,000 pounds of raw silk was produced in Italy last year.

Nothing but the finest and purest ingredients are used in baking Christie's Biscuits, and since it takes half an hour to make each one, you can be sure that every Christie's Biscuit is as good as it can be.

Failure In Ethiopia

Italian Venture Not Proving As Profitable As Expected

In his dispatch to the Sunday Sun the noted British Journalist, Mr. A. G. Gardiner, suggested that the world outlook is improving and that the "It is no small measure due to the feeling that things are not going well with the predatory powers, as exemplified by the difficulties that the Fascist powers are encountering in Asia, Spain and Africa, putting his main emphasis on the apparent failure of the Italian venture in Ethiopia. His disclosures regarding Ethiopia are significant.

Admitting first of all that a nation armed to the teeth can play havoc with an unarmed and helpless people, especially in these days of mechanized warfare," Mr. Gardiner points out that military conquest is merely a preliminary step. The real problem of that consolidating and exploiting a conquest, begins only after the soldiers have left their work. The Italian victory in Ethiopia, Mr. Gardiner declares, was "a calamity for the Ethiopians," but, "it is proving a less calamity for the Italians."

According to information reaching Rome, the Italian army is virtually marooned in this unfriendly country. The people of Ethiopia are openly hostile and taking refuge in the land and contribute to the production of raw materials. The "most virile" of them are abandoning their native land and taking refuge in the neighboring British colony of Kenya. Commercial restrictions and price fixing, Mr. Gardiner continues, are impoverishing Ethiopia's trade, so that the value of that country as a market for Italian goods has declined.

Information from other quarters fully substantiates Mr. Gardiner's report. Great military festivals have been held in Addis Ababa. The Italian press continues to talk of the enormous economic good that is going to flow from Ethiopia. But to date nothing whatever in the form of economic benefits has come out of this colony. In fact, apart from the sums it has itself been spending on building construction and for the maintenance of public works, the Italian Government has failed signally to interest the owners of capital in this Italian venture. More than that, has failed to persuade its own people to take up residence in Ethiopia.

Colonies have been few and far between, and even these few have had to be urged to move by means familiar only to the totalitarian regime. Doubtless Mussolini did not foresee this failure when he risked a general war in Europe in 1939 by plunging his legions into Ethiopia. A good economist and wise statesman, he must have anticipated the results, but not Mussolini. The question now to be asked, and one that Europe is asking, is whether his fellow-dictators have learned the lesson. Mr. Gardiner reports that Europe is increasingly hopeful that they have.—Baltimore Star.

Dislikes Plane Travel

British Cabinet Glad King George Prefers Other Methods

Queen Elizabeth does not fly because she is afraid of becoming airdropped. George VI. dislikes flying and the Cabinet does not want him in the air. As a result, any air trip of the King becomes a national event and the King's flight—Captain of the King's Flight—holds one of the soirees in England.

George VI. had been up once before as King (90 miles from Windsor to Marlborough Heath) when he dropped his hat and was rescued by the Royal Air Force, one of the nation's military aviation colleges. Ponderously, an official announced said King would "enplane" for the trip back to Sandringham. Said British dispatches "The nation waited with bated breath, easier to-night when it learned over the wireless that King George had completed safely in history conditions his return flight."

Coast City Means Business

The British Columbia Forestry Department will have something like 3,000,000 seedling trees ready for planting in the spring of 1939. The Western Province is going at the forestation business in a practical and serious fashion, states the Toronto Globe and Mail.

"Do the patent medicine you purchased cure your ailment?" "Morey" no. On reading the circular that was wrapped round the bottle he got two more diseases."

A wheat grain is fifty per cent. water.

Vagaries Of Lightning

Travels At A Speed Of 10,000 Miles A Second

Measurement of the speed of lightning, at 10,000 miles a second, was reported to the American Institute of Electrical Engineers at Pittsburgh, by Karl B. McEachron.

The speed was timed at the Empire State Building in the heart of New York city. This world's tallest building is struck more often than any other known place on earth. Mr. McEachron said. It acts like a needle to lightning.

A motion picture camera, on top of a skyscraper half a mile from the Empire State, has been taking pictures for three years. It is part of a lightning laboratory directed by Mr. McEachron for the General Electric Co.

New facts have been discovered. The most interesting, Mr. McEachron said, is that a tall building uses a tongue of fire to whetle lightning. Frequently before lightning hits the Empire State, a glowing tongue of flame leaps upward from the top of its 1,250-foot tower. It guides the lightning that always follows, crashing down to the tower.

The scientific importance of this, said Mr. McEachron, is to prove that the shape of an object on earth will often decide the direction of the initial lightning stroke.

Adopt our first lightning camera catches a stroke hitting a tree, Mr. McEachron said, men will understand why it is dangerous to be under trees. Sparks and streams of fire will be seen spreading over the ground at the base of the trunk, he predicted.

Take Views Of Interior

Motion Pictures Of Inside Of Human Body Now Made Possible

X-ray motion pictures of the inside of flat patients around the belt region of the abdomen, the Italian Government has failed signally to interest the owners of capital in this Italian venture. More than that, has failed to persuade its own people to take up residence in Ethiopia.

Colonies have been few and far between, and even these few have had to be urged to move by means familiar only to the totalitarian regime. Doubtless Mussolini did not foresee this failure when he risked a general war in Europe in 1939 by plunging his legions into Ethiopia.

A good economist and wise statesman, he must have anticipated the results, but not Mussolini. The question now to be asked, and one that Europe is asking, is whether his fellow-dictators have learned the lesson. Mr. Gardiner reports that Europe is increasingly hopeful that they have.—Baltimore Star.

Her Own Broadcast

A wireless set had been newly installed in the home which boasts an alert and intelligent four-year-old daughter. This young lady listened with great attention to an afternoon program before being sent off to bed. She said her nightgown party and afterwards added in a grave tone: "Tomorrow night at this time there will be another party."

THIS BACKACHE IS A REAL AGONY

KIDNEYS WILL CAUSE IT!

Backache is a sign of kidney trouble. It is a warning that your kidneys are not working properly. It is a warning that you need to take action now.

Jewish Persecution

Can Only Be Solved By Mass Exodus To The Holy Land

The problem of Jewish persecution can be solved only by a mass exodus of Jews to the Holy Land, Vladimir Jabotinsky, militant leader of the Jewish Revisionists, declared.

Interviewed by Haaretz, the Revisionist chief, whose party is in the extreme right wing of Zionist factions, proposed a mass exodus of 7,000,000 Jews to Palestine within a generation.

He said in cabinets or regimes are only episodes," Jabotinsky said. "The ultimate solution can only be large-scale emigration, which is both possible and practicable."

Palestine, including Transjordan, is a country of 100,000 square kilometers (38,244 square miles). In the entire country there are to-day only 1,500,000 inhabitants, one-third of them Jewish.

"Colonized at the density of France (75 persons to a square kilometer) it would be able to accommodate more than 7,000,000 and at the density of Switzerland, 10,000,000; that is enough room for the entire Jewish population."

Such a program, Jabotinsky added, "is more than possible—it is inevitable. It is a matter of time, and antisemitism triumphed in such a country or if there is danger to the Jewish people in Palestine."

"Our resolutions will go before the League of Nations, the British Government and all other bodies of international law," he said. "They will be adopted. They will be enforced."

1. Convoke an international conference of interested states to solve the problem of Jewish emigration. 2. Adopt our 10-year plan for the transformation of Palestine, including Transjordan, into a majority Jewish state by colonizing 1,500,000 immigrants at the first step in the great exodus.

3. Reconstruct the Jewish agency established by the Palestine Committee (from the League to Great Britain). "To-day the Jewish agency represents only five per cent of the Jewish people, and we demand that henceforth it be elected by universal suffrage."

The international conference will probably also concern itself with extra-Palestine projects, such as Madagascar (France) and the Azores (Portugal). Jabotinsky has been suggested for Jewish settlement. I wish all success to these projects, but I do not expect it. The sole reality is Palestine on the two sides of the Jordan."

Satisfactory Settlement

Executive's Wife Looking After Cat With Small Frenchie

When 64-year-old Spahr Annie Hanchette died in Sacramento, California, a month ago, she left \$85,000 to her husband and son, \$5,000 to her little, Lily, Executive of Annie Hanchette's estate, one time Mayor of Chicago, Mr. Hanchette, announced publicly that whoever took care of \$50 per month for the care of her cat and her dog, feeding, immediately 350 persons applied for the job. All said they loved cats, especially black ones. Many claimed they could feed Lily for less than \$50 per month, promised to turn over the surplus to charity, said they themselves were in dire need, or offered to kick back up to \$40 to Attorney Bivell. After due consideration of all replies, Mr. Bivell selected Lily's caretaker—gray-haired, kindly Mrs. Claude Hubert Stephens Bivell.—Time.

Premier's Visit To Europe

Visited Various Countries To Gain First Hand Information

The visit made by Prime Minister Mackenzie King to various European countries in Europe last year was in fulfillment of an intention he had entertained when representing Canada at the League of Nations in 1936. The Prime Minister told T. L. Church (Cons. Toronto Broadview) in the House of Commons.

He had visited France, Germany and Belgium, "to obtain first hand knowledge of conditions in Europe as time and circumstances permitted," Mr. Mackenzie King said.

To a lengthy list of questions by Mr. Church, seeking to know what was talked about in the conversations the Prime Minister had had with the heads of the various European governments, Mr. Mackenzie King said the interchanges "were made of a nature which it is the province to disclose."

Manitoba Beekeepers' Association has decided to organize a co-operative, intended to market between 1,500,000 and 2,500,000 pounds of honey annually and require a \$25,000 plant.

Radio Stations

Two New High-Powered Stations May Be Built Next Year

Two new high-powered radio stations will be built in the next year. If funds are made available to the Canadian Broadcasting Corporation through increased fees, Transpacific Stations, announced in the House of Commons.

It was a matter of urgency to increase the number of high-powered stations, he said. At the recent Havana conference, Canada was allocated seven clear channels instead of six as before. But unless these channels were used by Canadian stations, at least 50,000 watts, the other countries of America indicated they would not be respected.

GLEICHIN'S NEW
COUNCILLORS
HAVE PROBLEMS

Now that Councillors W. E. Thompson, L. Michael, Chas. Thompson and D. MacDonald have been elected it is in order to refer to the seven local administrators as the new town council. Of course, Councillor W. Thompson is the only new member, as all the others were re-elected, while Mayor N. T. Purcell and Councillors Menard and P. Deshayes have another year to complete. However, as a body they start on another milestone of service and it is the custom to refer to all incoming councils as new councils. The call vision the mayor and the council a successful term of office, that is success under difficulties, which at the present time have bequeathed to them.

Every member of the council has had experience on the Gleichen council and should be able to avoid the pitfalls of inexperience. The municipal task for the next year or two will be so small one, but it is hoped that their actions will be characterized by reciprocity in co-operation, the council taking the ratemakers into their confidence in all matters and the ratemakers giving them their co-operation in working out of the ratemakers problems. The fundamental necessities of community life, adequate fire protection and water supply, good streets and sidewalks and irrigation. These are not trifles but fundamentals, while permanency should underlie all undertakings in this direction it is not always possible. Slogans and makebells in regards to the different undertakings mean throwing money away, and just use planned economy there should be as a rule permanent works are always planned. Deterioration is noted as one checks up on these estimates on his trips of investigation, and there is no gaining the fact.

The annual financial statements, showed a fairly satisfactory state of affairs, but a community is just like a business concern, its assets have to be kept from being impaired. And impaired civic undertakings result in a legacy of extraordinary capital outlays being bequeathed to succeeding councils, as well as in the meantime, such undertakings being a constant bill of expense.

Perhaps Mayor Purcell and the council will have a solution of these big problems, but whether or not they are paramount problems confronting our civic administrators, at a time when throughout our nation province and communities, men are women are demanding action, encourage to branch out along new lines. The old crotchets, and the stand stiller rapidly becoming a back number. "Change the system, it must present day needs" is not a late political phrase, it is a heart throbbing of the nation today, so even to our civic fathers, we would say "Ap proach your 1938 problems in the spirit of 1938. Coming events cast their shadow, and the shadow is a plain as day."

GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister.
Mrs. H. Birch, choir leader.

Miss Jean Farguharson, pianist.

7:30 p.m. Divine Worship. Sub
ject: "The story of The Good Samaritan, and the Great Supper." Illustrat
ed with film slides. Both young and
old are cordially invited.

CANADIAN SCALLOP SUPREME

Place in a greased baking dish three cups of diced fresh or left over vegetables (carrots, potatoes, onions, etc.) and add one cup o cooked and flaked Canadian fish pour a white sauce over the fish an vegetables, sprinkle finely-sifted breadcrumbs over the top, dot with butter. Bake in a moderate oven until the crumbs are nice browned. Any kind of Canadian fish may be used. The white sauce can be made by melting three tablespoons of fat or butter, blending in three cups of flour, adding two cups of liquid either half milk and a vegetable water; a milk-and-cooking the mixture until smooth an thick, meanwhile stirring constantly. Canadian fish foods are comparable in meats in nutritive value and they are especially rich in health giving minerals and vitamins.

FROM MANY MINDS

Music is the universal language of mankind. Before we can bring happiness to others, we must first be happy our selves; nor will happiness abide within us unless we confer it on others. If there be a smile upon our lips, those around us will soon smile, too, and our happiness will become the true and deeper as we see others are happy. A demagogue is a politician whose chief ambition is to stand on

REPUTATION

When an organization becomes a vital part of our industrial life, its stability is rigidly guarded by its good reputation.

The Brewing Industry of Alberta prize reputation above all else. Their complete organization is composed of skilled men,—versed in every step of the Brewing Industry from raw materials to the ultimate consumer.

Thus public interests are considered and protected in every purchase of ALBERTA BEERS, and the industry's reputation is assured at all times.

The BREWING INDUSTRY OF ALBERTA

the grave of a great, dead industry, and boost to a multitude of the unemployed of his money making deeds. A happy life is not made up of negatives. Exemption from "nothing is not possession of another. There is no solitude in nature. Let not the littleness of people disturb you. Remember that if you have been made big enough to do big things in life, you have been made large enough to overlook little things. So do not imagine you are great so long as by selfish yourself you find jealousy, hatred, malice, or even the spirit that feeds in your heart. These and greatness sleep not in the same soul. Nothing is deep, difficult, or profound when you get acquainted with it. Since Staden-Powell started the Boy scout movement in 1907 he has been located 34 times and has received six university degrees. No less than 16 countries have recognized him for his service to his kind. You cannot believe in honor until you have achieved it. Better keep yourself clean and bright; you

LLOYDS OF LONDON

are the window through which you must see the world.

Gall can never fill a vacuum. One Kentucky man shot another who probably called him a communist. Probably objected to being called common.

About the only job some fellows appear able to hold is that of husband. Often clear profits are made through shady transactions.

Do You Need Any of the Following?
